

Diverse Abilities
Dorset's Disability Charity

Tree-mendous effort!

For the 2nd year running Keyfort has sponsored Diverse Abilities' Tree-Cycle Scheme. The scheme takes place during the first weekend of January helping the local community dispose of their Christmas trees, while raising funds to support adults and children with disabilities in Dorset.

Before Keyfort joined, Diverse Abilities created their vehicle routes manually (which took up a lot of employee and volunteers' time). Keyfort recognized this and created TreeVista software that creates vehicle routes by using an exported file from the Diverse Abilities' collection sign-up software.

This year, TreeVista assisted 25 vehicles and drivers with their routes enabling Diverse Abilities to collect 1139 Christmas trees and raise an incredible £7842. Diverse Abilities had to close the scheme early due to reaching full capacity.

Well done to the hard-working staff & volunteers of Diverse Abilities, a tree-mendous result!

Cyber security is on the list for 2019

In response to the ever-increasing threats to cyber security, Keyfort are running annual vulnerability scans free of charge for our managed service customers. Over the next few weeks, the vulnerability scan reports will be sent out to help identify and action responses.

Coming Soon - For Keyfort's Managed Service customers, we will soon be deploying our IT Engineering Services Portal! Which allows you, using only your smartphone, to check existing cases, manage change requests, check installation progress and view IT system status in real time.
