

CYBER ESSENTIALS

Cyber Essentials is a simple and effective Government backed scheme that will help you protect your organisation against a range of the most common cyber attacks. Cyber essentials also provides a statement of the basic controls which organisations should use in order to protect themselves from threats. Cyber Essentials Plus is the same as the Cyber Essentials process plus hands-on technical verification is carried out by the accreditation body.

Cyber Essentials will help you avoid the consequences of such things as:

- Ransomware
- Phishing attacks
- Malware
- Password guessing
- Network attacks

The five controls which can be implemented immediately to strengthen your cyber defences:

1. Use a firewall to secure your internet connection
2. Choose the most secure settings for your devices and software
3. Control who has access to your data and services
4. Protect yourself from viruses and other malware
5. Keep your devices and software up to date
